SIZE & WEIGHT LEGAL LIMITS

| | INTERSTATE | OTHER STATE ROADS |
|-----------------------------------|---|---|
| WIDTH: | 102" | 102" |
| HEIGHT: | 13' 6" | 13' 6" |
| Auto-transporter semitrailers | 14' 0" | 13' 6" |
| LENGTH: | | |
| Straight Truck | 40' | 40' |
| Tractor-Semitrailer Combo | No Limit (with legal trailer, including National Highway System routes) | 100' unless otherwise limited. Such routes will be posted (except NHS routes) |
| Semitrailer | 53' * | 53' (unless route is posted otherwise) |
| Tractor-Semitrailer-Trailer Combo | No Limit | 100' |
| Combination Trailer | 28' | 28' |
| Auto/boat-Transporter | No Limit | 100' ** (unless posted otherwise) |
| Each Unit | 56' | 56' |
| Maxi-Cube Combo | 65' | 65' |
| Cargo Box | 34' | 34' |
| Pair of Cargo Boxes | 60' | 60' |
| Saddlemount Combo | 97' | 97' |

Special limitations or restrictions:

* On interstate and NHS routes, single-piece loads may be transported on an extendable semitrailer that exceeds 53', provided that no pieces will be loaded end-to-end and the semitrailer does not exceed 75' in length; on roads other than the interstate and NHS routes, the same rules apply, except that the overall length cannot exceed 100'. Empty extendable semitrailers or extendable semitrailers transporting a single-piece load of 53' or less are required to maintain a semitrailer length of 53' or less. When the semitrailer is extended, the rear extremity of each extendable semitrailer or load must be marked with a 4" multidirectional amber strobe light and with 18" bright red or orange warning flags on the rearmost of the load or semitrailer.

** Federal allowances for auto/boat overhang includes 3' front and 6' rear overhang inclusive of overall length.

WEIGHT: *

| | | |
|----------------------|--|---|
| Single Axle | 20,340 lb | 20,000 lb |
| Tandem Axle | 34,000 lb (exception: if vehicle is less than 55' long and gross weight is less than 73,280 lb will allow 40,680 lb) | 40,680 lb |
| 3 Axles | Federal Bridge Formula ** | 61,020 lb |
| 4 Axles | Federal Bridge Formula ** | 70,000 lb |
| Gross Vehicle Weight | 80,000 lb | 80,000 lb max (subject to Federal Bridge Formula ***) |

* Any vehicle that exceeds gross or allowable axle weight, and that utilizes idle reduction technology will have a penalty calculated by reducing from the actual gross weight, single axle weight, tandem axle weight, or the allowed weight on any group of two or more axles the manufacturer's certified weight of the idle reduction technology or 550 lb, whichever is less. The operator must present written certification from the manufacturer specifying the weight of the unit and demonstrate that the unit is fully functional at all times.

** For any group of two or more axles, the Federal Bridge Formula will be applied to determine the allowable weight.

*** No lift axle may be used in computing allowable gross weight.
